WEST MOUNTAIN PLACER CO.

Works Started Up After a Long Period of Idleness.

Day before yesterday work was resumed at the West Mountain Placer company's works in Bingham, which have been closed down now for a year or more. This is an undertaking that promised large returns, and a big sun of money was expended in sinking a triple compartment shaft to bed rock. a depth of 150 feet, but the heavy flow of water caused a suspension of work and for a while it seemed as if the project was impracticable, notwithstanding the fact that the aurilerous standing the fact that the auriterous gravel, which was very rich, had been reached. Now, however, profiting by past experiences, it is believed that the development of these placers can be successfully carried on and that the great gold gravel beds underlying Hingham canyon will be forced to yield up their wealth of yellow metal. The result of the development work, as presented a year ago, demonstrated to some extent the value of these

The Trouble Between the Western and Union Pacific. CHICAGO, Jan. 11.-The trouble be

CHICAGO, Jan. II.—The trouble between the Colorado roads over the rates from Denver, show no signs of settlement, and the probabilities are that it win upset competery all chances of the Rio Grande Western becoming a member of the Wentern Possenger association agreement until this Bent has been settled. There seems to be a very small chance of settlement, for the Archison sura that it has no near of backing down from the position taken, and there is little likelihood that the Emon Pacing Denver & Guif will take its treasts from the hands of the brokers. It cannot get them all now, even if it wished to do so.

There is a general feeling among the western freigh lines that they will do well to go slow in forming their pool until after the pgh against the joint traffic association in the east is terminated. If that association was, there will be nothing in the way of the pool of the western roads, but if they go ahead and form their agreement, and if the joint traffic association is knocked out by the souries, the western lines will have nothing to stand upon.

MOUND BUILDER'S CORN.

summer by Charles Graham, a nursery-man of this county, and the result ites man of this county, and the result hese upon the desk before your correspondent as he writes, says a letter in the Indianapolis News. Last rear Mr. A. A. Graham, of Mount Vernon, ind., made a visit to the vicinity of Alton, III., and called upon a friend, who had just opened a mound builders' burial mound. Upon the mound grow several large trees, among them an pak four feet Chon the mound grow several large trees, among them an oak four feet in diameter, and thus the age of the mound was established as considerable. In it were found the crumbling remains of bones, and among other utensils a large pot, containing a maire very much like our present common red corn. Of this Mr. Graham secured several grains, and on returning bome planted it. It grow, and the result was that he produced a strain of corn which is most likely the ancestor of the corn we new cultivats.

In spite of having been in the grave for cartaining not less than 400 years, it grew very rapidly, and produced a large, well-shaped rear upon a fairly tall stalk. The east is well set, the grains being somewhat smaller than any of the present varieties, except pop-corn in shape the grain resembles dried sweet corn, being rough and wrinkied. In taste it is sweet and grouph and wrinkied. In taste it is sweet and grouph and recompense makes.
